Beam 11.93 m

Shipyard JFA Yacht

Flag UK

Hull Materials

Aluminium

Exterior Design :

Marc Lombard

Maximum Crew

Capacity 4

Draft 2.20 m

Launch Year 2018

Deck Materials

composite

Composite

Range: 6 000 nm

Maximum overnight

guest capacity 9

The NDS Evolution Yacht embodies the boldness and determination of its owners, who after feeling the indomitable call of the oceans, chose to sell their business and embark on the construction of a vessel specifically designed to defy the most extreme elements.

This extraordinary vessel took shape in JFA's renowned shipyards in France, where every rivet and fiber was carefully crafted to create a marine vehicle that combines robustness and elegance. The decision to work with aluminum experts and catamaran specialists demonstrates the owners' commitment to excellence and performance.

The challenge was colossal: to design a vessel that was both tough and agile, capable of navigating the tumultuous waters of Antarctica and the Arctic without hindrance, while offering the comfort needed to explore the tropical paradises of Polynesia. The result of this ambition is the NDS Evolution, a maritime masterpiece that embodies the perfect fusion of strength and finesse.

Thanks to years of meticulous planning and hard work, the NDS Evolution is ready to challenge the most formidable seas, while offering its occupants a haven of peace and security. Whether sailing among the glaciers of Antarctica, exploring the fjords of the Arctic or simply relaxing on the white-sand beaches of the Polynesian islands, this vessel is the embodiment of limitless freedom.

In conclusion, the NDS Evolution Yacht represents much more than just a ship; it is the symbol of a lifestyle where every horizon is an invitation to adventure, where every wave is a promise of discovery. With its solid construction, refined design and limitless seaworthiness, the NDS Evolution is ready to take its occupants to new horizons, whether in the icy waters of the South Pole or in the sunny tropics
